

Information Technology Software Development

Robbins Guill

Robbins Guill has been outstanding an student in all software development classes. He has also been successful in their other courses while maintaining a high GPA. He has excelled at learning new programming skills this year with programming robots and Android Mobile devices. Robbins enthusiastically represented the curriculum at Open House and STEAM 2020. Robbins completed an online course from NASA this year which has qualified him to participate this summer at a NASA location for a weeklong workshop. Robbins works in the Distance Learning department and recently an IT internship. Congratulations, Robbins!
