IT—Networking Outstanding Graduate

Roland Estep

During his time at Mitchell, Roland served as the president of the Mitchell Technological Society and obtained the highly sought after CCNA professional certification. Each step of the way Roland made sure to give back to his peers by hosting CCNA study groups and even staying hours after class in the computer labs to help others understand difficult concepts as well as prepare for certification exams. Roland plans on continuing to develop his skillset to position himself to be a DevOps or Systems Engineer. Let's congratulate Roland on this outstanding achievement.

CONGRATULATIONS!
